priming discharge between the priming electrodes and the data electrodes, and wherein during the even-line addressing period, a scan pulse voltage is applied to even-number scan electrodes sequentially while a priming pulse voltage is applied, prior to the application of the scan pulse voltage, to a priming electrode adjacent to the scan electrode to which the scan pulse voltage is to be applied, in order to generate a priming discharge between the priming electrodes and the data electrodes as claimed in Claim 1..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
